

## New capabilities for data models

For those suspected of terrorism or endangering public order, political persons of interest, mental patients who have caused accidents, and those with criminal records etc., we can engage in comprehensive smart surveillance encompassing electronic tracking, license-plate tracking, facial-image tracking, real-name tracking, and relationship network, etc., to free you from the method of “tailing.”

# 数据模型新赋能

对涉恐、涉稳、政治重点人，肇事肇祸精神病人，犯罪前科人员等，从电子轨迹、车牌轨迹、人像轨迹、实名轨迹、关系网络等多个维度，进行全方位智能化监测，解放“蹲点盯人”模式。
