# Real-life example 1: Caught a fugitive on the run for 20 years

Urumqi public security digital forensics unit dynamic face system

Since 2017, the dynamic face system of the Urumqi public security's digital image forensics unit has already helped Urumqi public security successfully capture a number of suspects, with dozens of cases cracked. The results are evident, including the capture of a suspect who was on the run for 20 years.

2016 — Covered all transportation hubs around Urumqi

2017 — Database of more than 50 million people for comparison
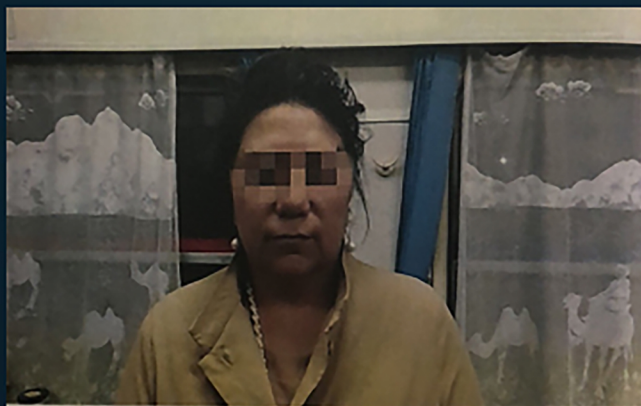

2018 — Thousands of accurate alerts to police
